Subject: Final Remedial Design and Implementation Plan #1 - Area 40, Aerojet Superfund Site, Sacramento County, California

Hi Everyone – Aerojet Rocketdyne, Inc. (AR) has finalized the Remedial Design and Implementation Plan (RDIP) for the first portion of work at Area 40. This plan has been modified to incorporate responses to your comments on the draft version of the document (included as Appendix I to the Final RDIP). Below are a few items of note:

- AR has coordinated with the City of Folsom, US Army Corps of Engineers, and California Department of Fish and Wildlife regarding the substantive requirements of each entity. These requirements have been incorporated into the final RDIP.
- The ecological habitat restoration plan was added to the document. To make the document flow, the ecological habitat restoration plan was inserted as Appendix B, which resulted in the remaining appendices to shift by one letter. Since the responses to comments were already reviewed and accepted, we did not change them. Therefore, references to Appendix B, Design Drawings (for example) in the responses to comments are now referring to Appendix C, Design Drawings.
- AR is currently conducting baseline ambient air monitoring at Area 40. Ambient air samplers were deployed (along with sampling devices placed by the RWQCB) on August 5 and are scheduled to be retrieved on August 19.
- AR is currently in the process of procuring a contractor to implement the activities described in the RDIP. We anticipate procurement to be completed by the end of August and field work to begin in early September. We anticipate that the excavation in the source areas will be completed in 2019 and, depending upon weather and other factors, the remainder of the excavation work may be completed in either 2019 or spring 2020.

You will soon receive an email from Ms. April Maiorino providing you a link to the document. Instructions on how to download the document will be included in the e-mail. If you have any issues with retrieving the document, please let me know.

I will be sending out hard copies of the document early next week. Thanks! Chris

Subject: Remedial Design and Implementation Plan #1 - Area 40, Aerojet Superfund Site, Sacramento County, California

Hi Everyone – Per the December 14, 2018 Voluntary Cleanup Agreement, between the California Department of Toxic Substances Control and Aerojet Rocketdyne, Inc., I am hereby notifying you of the availability of the Draft Remedial Design and Implementation Plan for the first portion of work at Area 40. This plan includes, as appendices, the draft Construction Quality Assurance Plan and the Draft Health and Safety Plan.

You will soon receive an email from Ms. April Maiorino providing you a link to the document. Instructions on how to download the document will be included in the e-mail. If you have any issues with retrieving the document, please let me know.

I will be sending one hard copy of the document to you early next week. In order to maintain the schedule included in the Voluntary Cleanup Agreement, please submit your comments to me by June 28, 2019. Thanks! Chris

Christopher M. Fennessy, P.E.
